

ABSTRACT OF THE DISCLOSURE

A personal care product is provided which includes an unsaturated organic material with at least one olefinic double bond susceptible to degradation into a color bearing substance, the unsaturated material being selected from C₁₀-C₅₀ terpenoids and C₁₂-C₄₈ unsaturated fatty compounds selected from the group consisting of fatty alcohols, fatty acids, fatty acid glycerides, fatty acid salts and combinations thereof, a substituted urea as a stabilization agent to prevent color body formation, and a cosmetically acceptable carrier. Particularly useful as a stabilizing agent is hydroxyethyl urea.
